Rewards

## A word of thanks from **Adrian Capogreco**

At Nutrien Ag Solutions, going further for our customers is at the heart of everything we do. That's why the Nutrien Rewards Program is designed to give back to our loyal customers like you — rewarding your ongoing partnership with meaningful value.

In this catalogue, you'll find a carefully curated selection of rewards that reflect the way you live and work. Whether you're looking for tools and equipment for the farm, household essentials, family experiences or lifestyle luxuries, there's something here for everyone. You can redeem rewards using your available points; or get there faster with points+pay.

We know you have a choice when it comes to sourcing your agricultural products and services. Your ongoing support and loyalty helps us go further in delivering value, service and innovation for Australian agriculture.

# ANOTHER WEAPON IN THE FIGHT AGAINST GLYPHOSATE AND PARAQUAT RESISTANCE

**Glyphosate and Paraquat resistance loom as a significant threat to Australian agriculture, with evidence from the Grains Research and Development Corporation (GRDC) showcasing alarming instances.**

GRDC reports indicate Glyphosate-resistant weeds like annual ryegrass and sowthistle spreading across fields, diminishing the herbicide's effectiveness. Similarly, Paraquat, a powerful alternative in weed control and critical rotational weapon to manage Glyphosate resistance, is now also facing instances of resistance in various weed species, raising concerns for its efficacy.

If growers were to lose both these actives as effective weed management tools, the implications would be significant. It is therefore critical that the industry take all available actions to prolong the effectiveness of these two actives. This includes diversifying weed management practices, integrating non-chemical methods, and rotating herbicides to minimize the selection pressure favoring resistant weeds. Using high quality products with optimal surfactant packages is also vital to maximise the longevity of these products.

Imtrade's Guerrilla® was designed in our leading formulation facility based in Kwinana, Perth, with the aim to provide the industry with the most robust and quality Paraquat product on the market. This has become even more relevant in today's context with the APVMA's review into Paraquat and the likely tightening of use rates.

Guerrilla® contains a PS2 inhibitor which slows down the photodegradation of the Paraquat molecule, giving Paraquat time to work longer and more effectively in the plant. This delay provides more robust control against hard to kill weeds, reduces 're-strike' and provides greater freedom of use when compared to other Paraquat based products, which rely on favourable climatic conditions to be applied.

The other key to Imtrade's Guerrilla's® superiority is its fully customised surfactant package. The four carefully selected and balanced components of this surfactant package provide the optimal blend of wetting and spreading, target surface penetration, foam suppression and compatibility, resulting in premium droplet retention and coverage.

Maintaining the efficacy of these critical actives is the responsibility of all members of the industry. Imtrade CropScience, as a 100% Australian owned company, is extremely proud to play our part in developing formulations which provides Australia growers with effective solutions to help maximise the longevity of these actives.

**To learn more about Imtrade Guerrilla®, please contact 1800 171 799 to discuss with one of our agronomists or visit our website at [imtrade.com.au](http://imtrade.com.au).**

**HASTEN<sup>†</sup>**  
**SPRAY ADJUVANT****DON'T  
KILL  
WEEDS  
WITHOUT IT.****UNLOCK THE POWER OF YOUR  
HERBICIDE WITH HASTEN**

In the dynamic world of agriculture, staying ahead means having the right tools at your disposal. VICCHEM's HASTEN Spray Adjuvant is proven to unlock the power of your herbicide to make a real performance difference in your farming operation.

HASTEN tackles the challenges of effective weed control by breaking through the waxy plant cuticle, crucial for enhancing herbicide penetration. Its key mechanism, lipophilic diffusion, involves Ethyl and Methyl Esters that help transport active ingredients directly through these protective barriers.

HASTEN also contains non-ionic surfactants which ensure thorough coverage and adhesion of the herbicide on the plant surface, mitigating the risk of evaporation and runoff. By maximising your herbicide contact time and minimising wastage, HASTEN transforms every herbicide application to a precise and efficient endeavour.

HASTEN's ability to extend herbicide contact time on plant surfaces by slowing the evaporation of spray droplets is delivered through its esterified oil in its formulation and further enhances retention by preventing the crystallization of water-soluble herbicides, guaranteeing precise and targeted application. Additionally, HASTEN aids in maintaining adhesion of spray droplets to plant surfaces, significantly reducing runoff and wastage, and improving the results of your herbicide.

With HASTEN, uniform wetting and spreading on plant targets are guaranteed, thanks to its ability to increase the coverage of spray droplets. This ensures that every part of the plant receives the necessary herbicide treatment for killing weeds. Moreover, HASTEN's formulation ensures dispersion and forms a stable emulsion in tank mixes, delivering consistent and reliable performance with every application, thereby offering growers predictable results and maximum efficiency.

*"The most expensive herbicide you'll ever use is the one that doesn't work, so you should ensure you have confidence in all the products you put in your tank. HASTEN Spray Adjuvant's unique formulation is a proven performer that is well recognised in the industry for improving the efficacy of a wide range of herbicides. HASTEN's proven results over the years empowers growers to fill their tanks with a quality Australian made product, at the same time as filling them with the confidence that they're putting their best foot forward in the war against weeds",* says Jesh Smith, Agronomist and VICCHEM Territory Manager.

To discover more about how VICCHEM's HASTEN Spray Adjuvant can improve your herbicide performance, contact your local Nutrien Branch, or visit [VICCHEM.COM.AU](https://vicchem.com.au/hasten) <https://vicchem.com.au/hasten>

**BREAKING THROUGH BARRIERS**

HASTEN excels in breaking through the waxy plant cuticle, ensuring herbicides penetrate more effectively. It boosts adhesion and spread, enhancing compatibility and ensuring thorough coverage.

**MIX WITH THE BEST**

Australia's top agri-chemical companies recommend their product is mixed with HASTEN Spray Adjuvant to deliver optimal effectiveness of their product on farm.

## SPRING MOUNTAIN HONEY

**Spring Mountain Honey is a family-owned, small business located in the heart of southeast Queensland. Founded in 2014 by Daniel and Kate Harbourn, Spring Mountain Honey stems from a deep respect for nature and a commitment to preserving bee populations.**

The Harbourn's beekeeping journey began on their small block of land where beehives were initially fostered to encourage pollination of their home vegetable garden. Their passion for beekeeping soon followed along with the growth of their business. The family are dedicated to producing raw honey, without the use of chemicals or artificial food sources for the bees; taking only what is necessary and always prioritising the wellbeing of their bees and the sustainability of the hives.

The beeswax wrap included in this edition of your Nutrien Rewards catalogue has been handcrafted by Kate and Daniel, from OEKO-TEX® certified organic cotton and infused with pure Spring Mountain Honey beeswax. Your new wrap is versatile and best of all, compostable when they can no longer be used to preserve food.

We hope you love it!

*The Nutrien Rewards Team*

For more information on your beeswax wrap, visit [SpringMountainHoney.com](http://SpringMountainHoney.com)

### TIPS FROM THE SPRING MOUNTAIN HONEY TEAM TO MAINTAIN YOUR BEESWAX WRAP:

- Wash using **cool-lukewarm water** with a small amount of dish soap. Rinse and air dry out of direct sun, before storing in your kitchen draw.
- **Avoid heat.** Because our beeswax wraps are made from natural beeswax they need to be kept away from heat, including hot water, steam, hot food and flames. Wait until food is cool and then cover with your wrap. Do not put wraps in the dishwasher, microwave oven, or anywhere they can get hot such as direct sunlight.
- Your beeswax wrap should last up to a year if looked after correctly. With day-to-day use, stains and creases may appear, however they won't impact your wraps ability to do their job.

## SIX REASONS TO CHOOSE AXIAL® XTRA HERBICIDE OVER A GENERIC PINOXADEN

**Not all pinoxadens are the same when it comes to wild oats, Phalaris and annual ryegrass. AXIAL® Xtra from Syngenta means no compromises.**

Pinoxaden remains a valuable tool for the management of wild oats, phalaris and annual ryegrass in wheat and barley crops, with AXIAL® Xtra herbicide being the leading choice in terms of efficacy and ease of use.

AXIAL® Xtra herbicide has been proven to perform better in more marginal conditions or where target site resistance exists to other Group 1 (A) herbicides, thanks to the Syngenta product's superior uptake within target weeds.

AXIAL® Xtra herbicide is also the dependable choice in many real-world conditions, where problems can easily arise, saving users time and money in the long run.

**Here's six reasons to consider choosing AXIAL® Xtra herbicide over a generic pinoxaden.**

1. AXIAL® Xtra is formulated for all water types. Laboratory tests have proven that AXIAL® Xtra mixes well in hard water, as well as cold water. This means it will stay suspended in a spray tank, without causing nozzle blockages.
2. A low-foaming formulation, AXIAL® Xtra is not prone to tank mixing difficulty, saving time when mixing compatible products, and fewer delays to spraying.
3. Extensive experience with AXIAL® Xtra has shown that it has stable shelf life. Unlike other formulations, AXIAL® Xtra doesn't crystallise during storage or settle out. So if your spray program changes throughout the season, or your holding partially used drums from one season to the next, users will have fewer worries.
4. AXIAL® Xtra has an optimised, built in adjuvant. Our extensive trials have resulted in superior efficacy thanks to the optimisation of the adjuvant

loading. This results in efficient dispersion onto target weed leaves and better uptake, for a faster brownout.

5. AXIAL® Xtra includes our own proven safener, which provides greater peace of mind when it comes to crop safety in wheat and barley.

6. Syngenta was the first to bring pinoxaden to market, as AXIAL®, now sold in countries around the world. Being the first, we have an unrivalled understanding of this active ingredient and have invested more time than anyone ensuring that users can manage grass weeds with maximum efficacy.

AXIAL® Xtra is also an excellent alternative to fop herbicides such as fenoxaprop. Being structurally different to FOPs, AXIAL® Xtra is able to overcome FOP target site and metabolism resistance.

Want to know more about using AXIAL® Xtra? Visit [www.syngenta.com.au/axialxtra](http://www.syngenta.com.au/axialxtra) or speak to your local Nutrien Ag Solutions representative.

# AXIAL® Xtra. No compromise.

AXIAL® Xtra delivers wheat and barley growers improved activity on grass weeds such as wild oats and phalaris, all without impacting crop safety.

Designed to maximise application properties, compatibility and performance, AXIAL® Xtra delivers exceptional results with no compromise on formulation quality.

For further information on the Xtra benefits, talk to your local Syngenta representative or visit [syngenta.com.au/axialxtra](http://syngenta.com.au/axialxtra)

# It's always a good season with Castrol TRANSMAX Agri by your side

Making a go of a life on the land is not for everyone, but for those who do – chances are they wouldn't swap it for quids. And making a good go of it is made easier with the Castrol TRANSMAX Agri range in your farm machinery.

With 3 variants to choose from, the Castrol TRANSMAX Agri range has been developed to deliver performance and protection for engines, transmissions, wet brakes, hydraulics and front axles including;

- Castrol TRANSMAX AGRI AS TRANS PLUS 20W-30
- Castrol TRANSMAX AGRI MP PLUS 20W-40
- Castrol TRANSMAX AGRI TRANS PLUS 80W

The wide application feature of the range can reduce oil inventory, simplify servicing and save money – while providing improved wear protection and soot handling.

So choose Castrol TRANSMAX Agri and make the best of the season.
