

# StormFLO® Rural

## Farmers' first choice for rural drainage

Introducing StormFLO® Rural from Vinidex, a durable, premium quality PE twin-walled pipe system, *made with recycled PE*.

Proudly Australian made and manufactured with tough Australian conditions in mind, StormFLO® Rural is ideal for applications including;

- **Channel replacement** - Divert water away from areas susceptible to flooding and replacement of existing channels to a covered solution
- **Culverts** - Water diversion under driveways, road crossings and sealed roads or unsealed carriageways
- **Stormwater use** - Water diversion, flood prevention and general drainage applications
- **Trickle flow pipes for dams** - Using StormFLO® Rural reduces the stress on the stability of the ground cover

### Features & Benefits include:

- **Size range 225-450mm** - other sizes available in the Vinidex range
- **SN 6**
- **Made with recyclable materials and 100% recyclable**
- **100% Australian Made**
- **Made to last**

Talk to your local Nutrien Ag Solutions or Nutrien Water store for further information or visit the [Vinidex Website](#).
